

Important Safety Information

Read and understand all safety precautions and instructions before use.

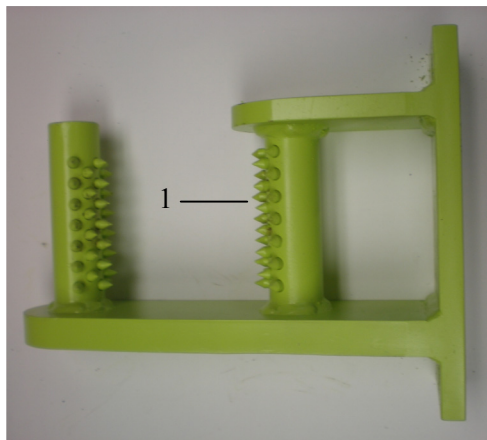

- The Bucket Grubber is designed for outdoor use.
- Check Bucket Grubber before each and every use for signs of wear. Do Not use if damaged or if not working properly
- The Bucket Grubber is designed to remove tree stumps up to 2.5" diameter
- The Bucket Grubber is not to be used on people or pets.
- **Intended for use with skid loaders with 50 hp or less.**
- **Intended for use on shallow rooted trees and brush.**
Functionality can vary by root system/tree type, soil type, and ground condition

*BG-23 Bucket Mount shown sold separately

Instructions

1. Attach the Bucket Grubber to the Bucket Mount model BG-23 (sold separately) using the 2 hex bolts provided with the Bucket Mount.
2. Be sure that Bucket Grubber System is secured to the bucket using the securing bolt on the Bucket Mount.
3. **Always cut tree off at 3ft to 4ft above the ground before using Bucket Grubber.**
4. Drive up to the tree to be removed and position it so that the tree is between the two grip bars on the Bucket Grubber.
5. Tilt bucket slightly to engage the no slip grip teeth and drive forward pushing the tree and root system out of the ground.
6. Once the tree is removed tilt bucket back to disengage the teeth.
***Take caution of all pinch points on the Bucket Grubber.**
***Take caution of Grip Bars when attaching the Bucket Grubber. Keep fingers and hands free and clear.**
