

IMPORTANT SAFETY INFORMATION

Read and understand all safety precautions and instructions before use.

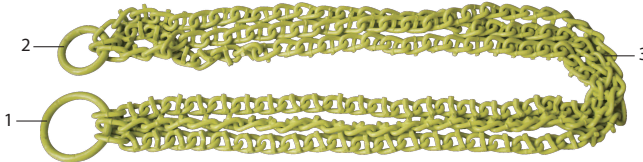

- The Shrub/Clump Grubber Extreme is designed for outdoor use only.
- Check the Shrub/Clump Grubber Extreme before each use for signs of wear. Do NOT use if it is damaged or not working properly.
- The Shrub/Clump Grubber Extreme is designed for use on shallow-rooted trees and brush. Functionality can vary by root system/tree type, soil type, and ground condition.
- The Shrub/Clump Grubber Extreme is not to be used on people or pets.
- **For use with ATVs, UTVs, and compact utility tractors.**

Figure 1

INSTRUCTIONS

1. Wrap the Shrub/Clump Grubber Extreme around the shrub or clump of trees to be extracted with the No-Slip Grip Teeth on the chains facing towards the shrub or clump. Keep the chain as close to the ground as possible.
2. Place the Small loop (#2) through the Big loop (#1). Cinch the chain through the loop on the opposite side from where you are pulling. This will allow the ring to tighten over the links as far as possible for the best grip.
3. Hook the Grubber Tugger Chain Xtreme (Model BG-12) to the small loop (#2) and attach the other end of the chain to your ATV, UTV, or compact utility tractor.
4. Slowly drive forward extracting the shrub or clump. DO NOT JERK THE CHAIN.
5. Remove the Shrub/Clump Grubber Extreme by backing up to add slack in the chain. Detach the chain from the Shrub/Clump Grubber Extreme.
6. Pull the Small loop (#2) back through the Big loop (#1).

| Ref# | Q'ty | Part# | Description |
|------|------|---------|--------------------------|
| 1 | 1 | BG24-01 | Big loop 3-15/16" I.D. |
| 2 | 1 | BG24-02 | Small loop 2-13/32" I.D. |
| 3 | 3 | BG24-03 | Chain 6 feet of 11/32" |
